

## Art/DT

- Make a collage of your favourite animal!
- Plant a seed of your choice, taking pictures every week and recording the changes you notice!

## Computing

- Make a video about the different parts of a flower.
- Create a PowerPoint presentation on sexual and asexual reproduction. Explore the similarities and differences between the two.

# Year 5 Summer 1 'Animals and their Habitats'

You may wish to take the time to complete a project at home this half term. The project should be based around our current Topic: Animals and their Habitats.

You can bring in completed projects at any point during the half term so that they can be shared with the class!

Here are some possible starting points, or you may have an even better idea for your project!

**Do you have your own exciting idea for a project on Animals and their Habitats?**

## Creative Writing

- From the perspective of a pollinator, write a story about how flowers are pollinated and fertilised.
- Interview a grandparent to find out more about the different stages of their life.

## Maths Investigation

- How many bees are normally found in one colony in the UK?
- Research approximately how many bees are found in 2 countries of your choice and then find the difference. Which has more and by how many?
